## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claim 1-25 and 32-35, are drawn to an image registration system, classified in class 382, subclass 118.
- II. Claims 26 and 27, are drawn to registration during a medical procedure, classified in class 600, subclass 414.
- III. Claims 28-31, are drawn to a surgical navigation system, classified in class 600, subclass 204.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in facial recognition. See MPEP § 806.05(d).

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in facial recognition. See MPEP § 806.05(d).

Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as performing a laproscopic procedure. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
